MAJOR WORK EXPERIENCE

2014
DESKTOP SOFTWARE DEVELOPER | PT. SUMBER DECOR
POS Desktop Sofware, named "FireSale", POS system with the transaction, history, and cash flow. Created for simple-to-use in mind and heavily optimized code for fast information processing.

2015
WEB DEVELOPER | WWW.RONYZHAO.COM
A company profile for professional Hypnotherapist with minimalist modern design, using WordPress platform with a custom handmade plugin, SEO optimized and now No.1 on google search engine.

2017
WEB DEVELOPER | ASTRA INTERNATIONAL
https://www.partpontianak.com is tracking thousands of goods current shipping location, a Laravel and Vue.JS web-based for advanced reactive web API, additionally using Google Analytics API for helping company calculate web traffic and Google Map API for helping customers find nearest Dealers using device's GPS.

2018
WEB DEVELOPER | UNONIM
Assigned for focusing web development with Wordpress & WooCommerce, with carefully written plugins for extensible eCommerce and Company Profile Websites and taking another level of modern web layouts, transitions and animations to meet designer creativity limits and to satisfy happy clients.

2018
SENIOR BACKEND DEVELOPER | PT. BOBOBOBO
Work with 5+ members every single project. Heavily build microservices from ground up with PHP Laravel Framework and Node+ExpressJS. Write an expressive, reusable and clean code with SOLID principles. Challenged to optimize large data processing code to be faster, lightweight and meet project's timeline requirements.
